BrightPath Tech - Proposal for QuickFlow

Response to RFP-2026-017: Procurement Workflow Automation Platform for GreenLeaf Retail Pvt. Ltd. Requirement: 500 users, 3 regional offices, SAP S/4HANA plus supplier-portal integration, go-live within 8 months, 3-year term. All prices in INR lakh, excluding GST.

1. Executive Summary and Understanding of the Requirement

BrightPath Tech offers QuickFlow, a multi-tenant approval and procurement application that can be configured quickly for GreenLeaf. We understand the need for purchase requests, approvals and supplier onboarding across three offices, with an integration to SAP S/4HANA.

2. Proposed Solution and Implementation Approach

QuickFlow is a web application with standard approval templates and a supplier portal. SAP connectivity is planned through a middleware component; the middleware option is to be confirmed after we review GreenLeaf's SAP landscape. Load testing has not yet been performed; we expect the platform to scale to the required user count based on prior deployments.

3. Timeline, Team Structure and Milestones

Total duration is 14 weeks. The team has 6 people. No dated milestones are included beyond go-live in week 14.

Role	Headcount	Responsibility
Project manager	1	Plan and reporting
Consultant	2	Configuration and testing
Developer	2	Templates and integration work
Trainer	1	End-user training

4. Price Table and Assumptions

Item	Amount (INR lakh)
Licence (year 1)	600
Implementation	560
Support (year 1)	140
Total	**1,300**

Assumptions: support for years 2 and 3 is not included in this price; it is quoted at 18% of the annual licence fee. SAP middleware licences and their implementation are not included. GST is excluded.

5. Security, Compliance and Risk Controls

BrightPath intends to pursue ISO 27001 certification once the platform is in production. Access control uses username and password; multi-factor authentication is on the roadmap. Data is encrypted in line with industry standards. We have no certifications at present and no independent audit reports. Audit logging is available but retention periods are not specified.

Key risks: SAP middleware scope is undefined, the timeline assumes no major change requests, and the company has not yet tested performance at scale.

6. Support Model, Relevant Experience and References

Support is by email during business hours (9am to 6pm, Monday to Friday). BrightPath was founded in 2023 and has completed one small deployment for a 60-user logistics firm. No customer references are available at this time.
