NexaWorks - Proposal for NexaFlow Suite

Response to RFP-2026-017: Procurement Workflow Automation Platform for GreenLeaf Retail Pvt. Ltd. Requirement: 500 users, 3 regional offices, SAP S/4HANA plus supplier-portal integration, go-live within 8 months, 3-year term. All prices in INR lakh, excluding GST.

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes NexaFlow Suite, a modular, API-first procurement workflow platform. We understand GreenLeaf needs approvals, supplier onboarding and invoice workflows for 500 users in three offices, integrated with SAP S/4HANA and a supplier portal, live within 8 months.

2. Proposed Solution and Implementation Approach

NexaFlow uses a modular design: workflow, supplier management and SAP integration are separate modules behind published REST APIs. The SAP connector is certified by the SAP partner programme. Delivery follows three phases, each closed by a go/no-go gate: Phase 1 foundation and design, Phase 2 build and SAP integration test, Phase 3 pilot and regional rollout. Performance was validated at 1,500 concurrent users with a 99.9% availability SLA.

3. Timeline, Team Structure and Milestones

Total duration is 7 months, with a weekly plan shared through a common project tracker. Payments are linked to milestones M1 to M4: M1 design approved (month 1), M2 SAP integration passed test (month 4), M3 pilot office live (month 6), M4 full go-live and hypercare start (month 7).

Role	Headcount	Responsibility
Engagement director and delivery lead	2	Governance, scope and risk
Solution architects	2	Design and SAP integration
Developers	4	Workflow and portal build
Test engineers	2	Functional, performance and security testing
Trainers and change lead	2	Training and adoption

Total team size is 12 people. The risk register lists 9 items with owners, triggers and responses.

4. Price Table and Assumptions

Item	Amount (INR lakh)
Licences (3 years)	720
Implementation (fixed price)	880
Training	120
Support (3 years)	580
Total	**2,300**

The implementation is a fixed price. Change requests are priced at the rate card of INR 1.2 lakh per person-week. Assumptions: GreenLeaf provides a SAP test system and a named product owner. GST is excluded.

5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001:2022 certified (certificate available on request). SOC 2 Type II is in progress, with the report expected in Q4 2026. Controls include SSO with MFA, role-based access reviewed quarterly, encryption at rest and in transit, and audit logs retained for 3 years. Vulnerability scanning runs weekly and a third-party penetration test is completed before each major release.

Principal risks and responses are listed in the 9-item register: SAP environment readiness (weekly readiness check), scope creep (change board with fixed rate card), and key-person dependency (named deputies for each role).

6. Support Model, Relevant Experience and References

Critical issues receive 24x7 support with SLAs: P1 response in 30 minutes and restoration target 4 hours. A customer success manager is assigned to GreenLeaf, and hypercare runs for 60 days after go-live. NexaWorks has completed 14 deployments. Three named references are available: a grocery retailer (700 users, four countries), a consumer goods company (SAP S/4HANA, 450 users) and a logistics provider (300 users, two regions).
