Orbit Digital - Proposal for OrbitProcure

Response to RFP-2026-017: Procurement Workflow Automation Platform for GreenLeaf Retail Pvt. Ltd. Requirement: 500 users, 3 regional offices, SAP S/4HANA plus supplier-portal integration, go-live within 8 months, 3-year term. All prices in INR lakh, excluding GST.

1. Executive Summary and Understanding of the Requirement

Orbit Digital proposes OrbitProcure, a procurement platform with supplier onboarding, sourcing and contract management modules. We understand GreenLeaf's need for a platform for 500 users across three offices and an integration with SAP S/4HANA and a supplier portal.

2. Proposed Solution and Implementation Approach

OrbitProcure is a mature product with more than 40 deployments. For the SAP integration we will use suitable connectors, to be finalised in discovery once GreenLeaf confirms its SAP version and custom objects. The supplier portal is included as a standard module. Performance has been demonstrated at customer sites of comparable size; a formal load test is proposed for the test phase.

3. Timeline, Team Structure and Milestones

Total duration is 8 months. The plan describes phases (discovery, build, test, deployment) but does not set dated milestones; these will be agreed after discovery. The team has 11 people.

Role	Headcount	Responsibility
Programme manager	1	Governance and reporting
Business analysts	2	Requirements and process design
Technical consultants	4	Configuration and integration
Testers	2	Test execution
Trainers	2	Training and support

4. Price Table and Assumptions

Item	Amount (INR lakh)
Licences (3 years)	800
Implementation	980
Training	140
Support (3 years)	630
Total	**2,550**

Assumptions: implementation is time and materials within the estimated effort; connector licences are extra if more than two SAP interfaces are required. GST is excluded.

5. Security, Compliance and Risk Controls

Orbit Digital states that it is ISO 27001 aligned and applies basic controls, including password policies and role-based access. Data is backed up daily. Multi-factor authentication is available as an option. Audit trail coverage and encryption details are described in general terms only; no certificate number or audit report is provided.

Risks: integration scope is not yet fixed and may affect cost and timeline; the plan has no dated milestones until discovery is complete.

6. Support Model, Relevant Experience and References

Support is available from 8am to 8pm, Monday to Saturday. Orbit Digital has operated for 15 years and has over 40 deployments, including awards for procurement technology. Five referenceable customers are available with published outcomes, including a 22% reduction in purchase cycle time at a retail group and a 35% reduction in supplier onboarding effort at a manufacturer.
